

POLLUX COMPACT INDUSTRIAL JACK-OF-ALL-TRADES

A COMPLETELY FLEXIBLE CONFIGURATION

Built for the toughest industrial applications and provided with a large variety of options: with the Pollux Tyro Remotes introduces a powerful, flexible and extremely compact remote control. Whether you need one or more controls you have a choice of more than 500 different combinations when it comes to the number of features, the switches and the choice to have your own laser engraved icons which are illuminated by means of the backlight. Do you choose a digital or analogue joystick? Should there be a potentiometer or are you going to use position switches? Are you going for a display that can give you data feedback or do you prefer a model with which you only operate the most important features? Anything is possible with Pollux. You name it; and Pollux can do it.

The Pollux is designed in close collaboration with our customers. The compact design, the joysticks, the illuminated display, keypad with backlight and integrated belt clip ensure excellent user comfort. The Pollux is dust- and waterproof and is available with a rechargeable battery or loose alkaline batteries. By means of the display all types of settings can be applied manually.

- **500+ combinations possible**
- **Analoque/digital joysticks**
- **Innovative backlight & customized icons**
- **Unique compact and ergonomic design**
- **Potentiometer**
- **Compatible with our Fieldbus systems**

POLLUX COMPACT INDUSTRIAL JACK-OF-ALL-TRADES

TECHNICAL SPECIFICATIONS

Number of functions	500+
Battery type	3 x AA NiMH battery
Degree of protection	IP65
Certification	CE, RED, EMC, LVD / E4 (automotive)
Dimensions	167,8 x 84,4 x 108 mm
Weight	600 - 700 g
Temperature range	-30°C / +60°C
Communication mode	Simplex
Frequency	433MHz
Modulation	Narrow band
Charging time	4,5 hours
Battery life	Approx. 20 hours
Reaction time	< 0.1 second
Maximum power	10 dBm
