

360° Camera systems - Ref. BRI.BN360-CAM

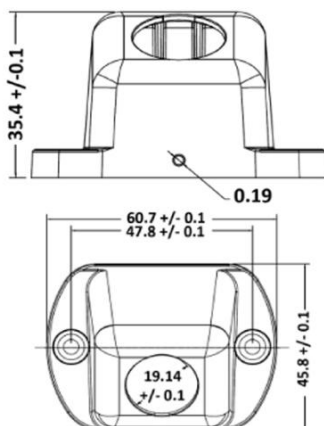

360° vision solution (12/24 Vdc) for bus and coach is composed of cameras, a central unit and a remote control. The four cameras create an image on a screen for the driver and the possibility to delate blind spot that's supporting the security of the passenger vehicles and reduces collisions with people and objects. This solution is compliant to R10 04 EMC (electromagnetic compatibility) regulation.

TECHNICAL CHARACTERISTICS

Housing Material	Aluminium
Resolution	640x3 (RGB)x480
IP protection	IP69K (camera)
EMC	ECE R10-04
Industry	Buses and Coaches, Trucks
