

360° Camera systems - Ref. BRI.BN360-EQUIP

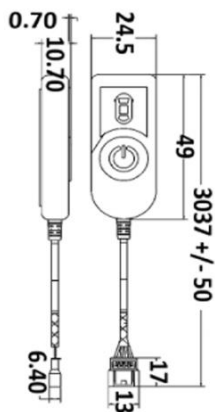

360° vision solution (12/24 Vdc) for bus and coach is composed of cameras, a central unit and a remote control. The four cameras create an image on a screen for the driver and the possibility to delate blind spot that's supporting the security of the passenger vehicles and reduces collisions with people and objects. 2 versions : wired remote control or infrared (IR) remote control with compact design This solution is compliant to R10 04 EMC (electromagnetic compatibility) regulation.

TECHNICAL CHARACTERISTICS

Fixation	Adhesive
Industry	Buses and Coaches, Trucks
