

360° Camera systems - Ref. BRI.VBV-7104HFM

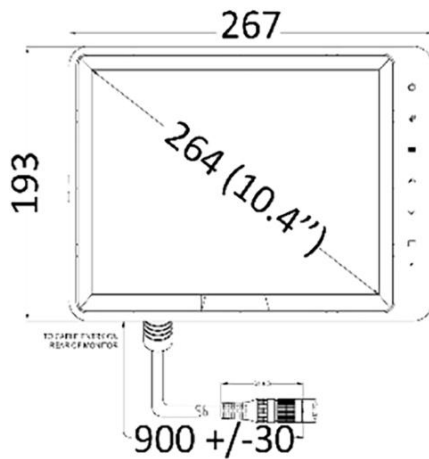

360° vision solution (12/24 Vdc) for bus and coach is composed of cameras, a central unit and a remote control. The four cameras create an image on a screen for the driver and the possibility to delate blind spot that's supporting the security of the passenger vehicles and reduces collisions with people and objects. This solution is compliant to R10 04 EMC (electromagnetic compatibility) regulation.

TECHNICAL CHARACTERISTICS

Product Type	HD 360° wired
Consumption	22W
Screen display	Multi-display
Housing Material	Aluminium
Options, upon request	7" screen
Screen Size	10,4"
Resolution	720P
Max Cameras	4 cameras max
Industry	Buses and Coaches, Trucks
